

THE FLAG AND ANTHEM

The institute tries to nurture each student through continuous engagement, looking into the holistic development of the learner in conformity with ethicality (***Dharamam Saranam Gachhami***) and to foster progressive and critical thinking, entirely free from judgmental bias. It builds the awareness that right development of technology at key administrative and examination matters would be a game changer. Many teachers are still committed to face to face teaching, as creativity does not necessarily emanate from machine.
